# CARING FROM **HOSPITAL** TO **HOME**

*Let Us Take Care of You*

A hospital discharge can be stressful for everyone involved—but it doesn't have to be.

Nurse Next Door helps with post-hospitalization recovery by providing patients with attentive care, making it easier to transition from the hospital to life back home. Even just a little assistance around the home can help you rest and recover, while greatly reducing the risk of readmission.

Following the hospital's unique guidelines for visitors, our team can come directly to you for a **FREE Caring Consult** to understand your needs. During this assessment, we'll customize a Care Plan for you, arrange safe transportation home and set up consistent, quality care to help you adjust back to the comfort of home.
